

## E Photographic History of Hazard Events

The **2017 Hazard Mitigation Plan** collected a multitude of historical photos of disasters, weather events and local hazard events from years past, some of which were carried forward from the original **2004 Plan**. Hopkinton’s photographic history should be a memorable record of the tumultuous history the Town has had with natural disasters. When disasters were declared, their number designations are provided (*DR-xxxx* or *EM-xxxx*). This **2024 Plan** continued to collect photographs of disasters, severe weather and other events.
